## Processes:

- Towels
- Hospital Gowns
- Garments
- Flat Goods

The Professional Folder by B&C Technologies is the optimum in small piece folding technology. It automatically sorts linens based on size, folds them according to the program selected, and optionally places them in one of three separate stacks. Once the proper number of linens are stacked they are transferred to the unloading table or optional conveyor. The Professional Folder can either automatically adjust the width for different sized linens or fold all pieces the same width. This versatile machine not only utilizes a traditional french fold but can also be programmed to use no, one or two crossfolds. Simple to operate, built to last and easy to afford.

## Technical Specifications:

**Electrical Connection:** 

230V, 3ph, 60Hz, 15A breaker 460V, 3ph, 60Hz, 15A breaker

**Pneumatic Connection:** 

100 psi / 7 bar 1/2" / 13mm connection 4 CFM / 6 cubic meters/hr

Weight:

2800 lbs 1280 kg

Piece Size: Unfolded Length: 13.75 to 72 inches

350 to 1800 mm

Unfolded Width: 18.75 to 60 inches Folded Width: 6.25 to 13.75 inches

480 to 1500 mm

160 to 350 mm

Standard

Jam control

Features: • 3.2 second cycle time

Wheels for mobility

• 100 Programs

Optional Features:

**Folded Length:** 

Sorting

3 Stackers

Conveyor on exit

7.75 to 23.5 inches

200 to 600 mm

· Large output table
